

# How do I place the order in EPIC?

The way a procedure is ordered determines where the order is printed out. If the order is printed out at the wrong location it can delay scheduling of the procedure.

For urgent and weekend procedures a page or perfectserve message to the IR physician on call is always recommended. For help in locating the on call interventional radiologist please [click here](#).

## **US** guided procedures:

Paracentesis  
Thoracentesis  
Liver Bx  
Kidney bx  
Thyroid bx
